

CSM

SECURITY

Our Services

Committed to professional services with sound management and a reduced carbon imprint

Security Guards

Trained guards backed with electronic reporting and self auditing

Security Patrols

Mobile Patrol services with Car Cams, body cams, live site checks and live gps tracking records

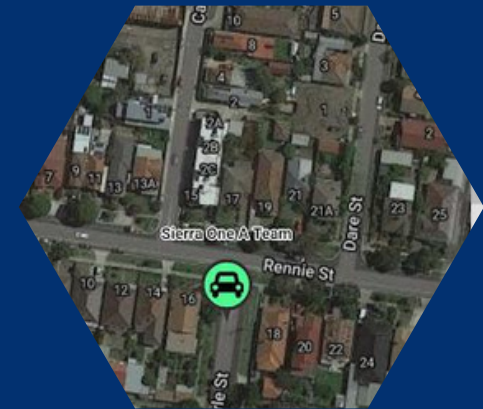

Solar & CCTV

Solar powered CCTV systems and hard wired cameras and alarms all monitored 24/7 days by our Control Room.

Our Clients are our business

Each service provided by CSM is assessed in line with the clients needs and regulatory requirements to determine the most effective and compliant standards of operation and we ensure that KPIs are self managed and assessable both internally and are achievable for our clients.

We Provide tailored services to best practice standards

By implementing a multi layered auditable set of technology and systems such as BWCs, GPS Tracking, Live Reporting and Electronic Scanning we can not only measure and track our service live but our clients also have live access to their service provider.

Projects

Pakenham Rail Project

Services included Mobile Patrol Vehicles, Solar Cameras and 24/7 coverage across multiple sites with not only regular checks but activation responses and cost savings across a large scale rail project.
referee Rick Manning (NWPA Management)

West Gate Tunnel

Mobile Patrol Response Vehicles, Protest Responses and Remote Surveillance of the critical stages of the West Gate Tunnel Project

Referee: Nat Lewis (Project Manager)

John Holland

Development of tailored services to reduce cost across Metropolitan Victoria for 9 infrastructure sites by creating a tailored cctv, guard and patrol service to ensure 24/7 coverage as required including protests and reduce criminal activity and provide value add through innovation for Government Projects.

Electronics

CCTV & Alarms
Solar Powered Cameras & Networks
Remote Safety Devices
Tailored Reporting Systems

We design & Engineer Solutions specific to client needs and continue to work towards service improvement and cost reduction strategies to build long term partnerships of mutual benefit.

We care

We are a paperless, tailored and innovative security company committed to reducing our carbon imprint while increasing our capabilities and expanding our reach. We believe in turn our innovation will drive and supplement the innovation and solutions of the future for our clients

Success by Design

Our clients are traditionally large scale projects such as the West Gate Tunnel, Railway Infrastructure and Government

We understand that when building a service to spec and innovating through technology that we have to have multiple layers of redundancy, systems that meet the compound test and can function on and off the grid and can ensure that the KPIs and compliance standards are always maintained despite the ever changing demands by clients and the authorities governing operational systems.
